Information about the OASYS dust cover (stuff no leather version):

In order to make sure that you enjoy your protective cover for a long time, you should observe the subsequently mentioned hints:

1. If you have letters on the protective cover only wash at 40° C max. and let it dry in the air (do not use electric dryers for clothing)
2. Do not directly iron onto the letters, but put a sheet of paper inbetween.
3. If there are no letters on the protective cover feel free to wash it in a normal way and iron it as normal.
